SATE...LIGHT

1998-2022 SaloneSatellite Young Designers

Il SaloneSatellite, quest'anno collocato nei padiglioni insieme alla biennale EuroLuce, rende omaggio al mondo dell'illuminazione con "SATE... LIGHT. 1998-2022 SaloneSatellite Young Designers", mostra che vede esposta una selezione di lampade progettate dai designer partecipanti alle sue varie edizioni ed entrate, poi, nei cataloghi delle aziende che hanno scommesso su questi talenti in erba. La raccolta completa dei pezzi entrati nel mercato fino a oggi è in esposizione, invece, dal novembre 2018 alla Collezione Permanente del SaloneSatellite, situata presso l'Artwood Academy a Lentate sul Seveso, in Brianza. La scuola, centro di formazione professionale, è stata fondata nel 2014 dalla Fondazione ITS Rosario Messina costituita da Federlegno e altri partner.

Dopo le mostre "Avverati – Progetti dal SaloneSatellite alla produzione" (2007) e "SaloneSatellite. 20 anni di nuova creatività" (2017), entrambe a cura di Beppe Finessi, la manifestazione dedicata ai creativi under 35 si riconferma, con questo nuovo "episodio", luogo di incontro per eccellenza tra imprenditori-talent scout e promettenti progettisti, nonché trampolino d'eccellenza verso il mondo della produzione. Arrivare ad avere un proprio pezzo sul mercato – alcuni dei progetti di questi ventitré anni sono diventati prodotti di successo, altri icone o addirittura entrati nei musei di design più importanti – per un giovane designer è un primo grande passo del riconoscimento del proprio valore e un ingresso ufficiale nel mondo del design.

Housed in the same pavilions as the biennial EuroLuce exhibition this year, SaloneSatellite is paying tribute to the lighting world with "SATE... LIGHT. 1998-2022 SaloneSatellite Young Designers". The exhibition features a selection of lamps by designers who have taken part in the various editions, which have entered the catalogues of the companies who put their bets on these promising young talents. The complete collection of pieces that have gone on the market to date has been on exhibit since November 2018 in the SaloneSatellite Permanent Collection at the Artwood Academy in Lentate sul Seveso, in Brianza. The school, a professional training centre, was set up in 2014 by the ITS Rosario Messina Foundation, comprised of Federlegno and other partners.

Following on from the exhibitions "Avverati – A Dream Come True" (2007) and "SaloneSatellite. 20 Years of New Creativity" (2017), both curated by Beppe Finessi, with this latest "episode", the event devoted to creatives under 35 proves itself yet again to be a peerless meeting point for entrepreneurs/talent scouts and promising designers, as well as an excellent springboard into the world of manufacturing. For a young designer, getting a piece onto the market – some of the projects of the last 23 years have become successful products, others have become icons or have even entered the collections of major design museums – marks the first great step towards the recognition of their importance and their official entry into the world of design.
